DETAILED ACTION

1. Claims 1-43 have been examined.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-43 are rejected under 35 USC 103(a) as unpatentable over Ramachandran(US Pat. No: 6,386,323) in view of Nicoll(US Pat. No: 6,484,936).
- 4. As per claims 1-43 Ramachandran teaches an automated teller machine in a drive-through(Abstract) which incorporates input parameters(Figs 2-31) where an audio input and output is provided(Fig 56)(Fig 57) as well as any noise(col 38 line 39-col 39 line 39)and which can dispense cash(Fig 42/242) and a display screen(Fig 26-31). Nikell teaches a a visual recording means(Fig 2/114) as well as means for accommodating users of different heights and physical requirements(col 1 lines 33-col 2 line 50). It would have been obvious to one skilled in the art at the time of the invention to combine Ramachandran in view of Nikell to teach applicant's invention. The motivation to combine Ramachandran in view of Nikell is to teach an ATM machine convenient for drivethough applications and which can accommodate applicants with varying physical requirements as enunciated by Nikell(col 1 lines 11-30).

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6.. Claims 1-43 are further rejected inder 35 USC 112(2nd) for failing to point out and particularly claim what applicant regards is the invention.
